International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS Austria

Warm greeting from snowy Tehran from IAAS Iran based at the University of Tehran, Campus of Agriculture and Natural Resources. Our team started to share its contents on our Instagram account, which you can find it here (<https://www.instagram.com/iaasiran/>). The team appreciates if you follow our account; this means a lot to us as we can reach to more IAASers all over the globe..

It is our pleasure to hear from you, please do not hesitate to contact us via:
iran@iaasworld.org or hamidian_a@ut.ac.ir

Sending you best wishes

What's up from IAAS Belgium

November 2020

IAAS
International Association of Students
in Agricultural and Related Sciences

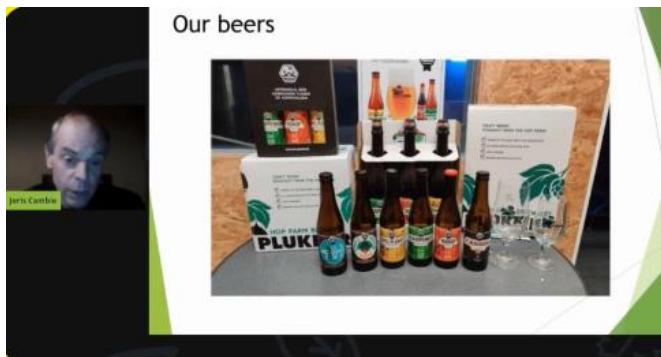

Greetings from IAAS Belgium

Hello everyone!

As I am sure was the case for many of you, IAAS Belgium was online this month. We had some teambuilding activities with our local committees and watched movies together. I can definitely recommend trying to play Town of Salem online, or among us is (of course) also a great option. Our biggest event this month was the online Beer & Sustainability event, the first of many IAAS scientific events! Thanks to everyone who joined us in learning about Belgian beer, from growing hops to producing alcohol-free beers and seeing the amazing work Father Isaac is doing with Trappist beers in the USA. Even though we enjoyed this online month, I hope to see some of you IRL soon!

Wishing you all the best,
Nina
National Director of IAAS Belgium

Beef & Sustainability Event

9- 11 November 2020, Online-Facebook

During three evenings we had different speakers from different backgrounds in the beer industry. The event kicked off with Joris Cambie, an organic hop farmer with his own brewery. He taught us which measures he takes to grow is hop organically and also how he uses that to brew his own beers. Sadly, since the event was online, we couldn't do a taste test, but it was a very interesting night nonetheless! On Tuesday we were happy to have Stijn Panis with us. Stijn has two nonalcoholic beers on his name so he explained to us why and how you can make alcohol-free beers. Last but definitely not least Father Isaac from the Spencer Brewery joined us all the way from the USA!

Trappist communities value sustainability and community work a lot, so it was no surprise that they have an amazing program to make their beer and monastery more sustainable. For example, they work with biomass energy that they generate themselves, they have a spring on their lands for which they provide a 7km long protection and much much more. We were very happy with how this event turned out. Not only was there a lot to learn. During three evenings we had different speakers from different backgrounds in the beer industry.

What's up from IAAS Bulgaria

November 2020

IAAS
International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS Bulgaria

Hello, young people!
That's how we greet each other!

November was a very difficult month for us. They stopped us from the university and sent us to our hometowns. So they canceled all our events that we wanted to organize for the anniversary of the university. But we do not give up! We had a lot of online meetings where we were thinking a lot of new projects. Despite the difficulties, we did not stop talking and helping each other. When someone was in the field and wanted advice, we connected and discussed the problem. We are one team! We are one family!

We from IAAS BULGARIA, we want to wish happy holidays to all of the IAAS FAMILY. Let 2021 be better so we can meet and get to know each other! We wish you happy holidays and a happy new year! We send a lot of love!

Best regards
Marinela Kostadinova
National Director of IAAS Bulgaria

Organizing World's Women Day Event

November 2020, Online- Zoom

We keep them a secret still, but I decided to share them with you because we are one big family! The biggest project we are organizing will be in March. For World Women's Day we will invite the most successful ladies in agriculture. We want to show that women are also strong and can cope in this "male" profession.

We still have many projects, but we are waiting for the seminars to allow. I shared that our team does not want to do online events. The reason is that they want to talk face to face with such successful people and shorten the distance. To share their worries about their careers and give them advice and motivation. We also think that we will not be so successful with online events, because Bulgarians are not so familiar with online meetings, and if we do them entirely in English, we are not sure whether the lecturers will agree, because they may not know the language.

Another Project from Other Country

November 2020, Online- Zoom

We do not stop creating! We have 10 almost ready projects that we want to realize and we are very excited! We have 3 new members. There are more, but they want to get involved after everything opens so they can immerse themselves in the work process.

We also tried to get into almost all the events organized by other countries. We share all their events and send them to friends to reach more people! We want to show them that we support them and that what they do is useful to us. We also had a lot of exams, but who could enter the meetings in ZOOM.

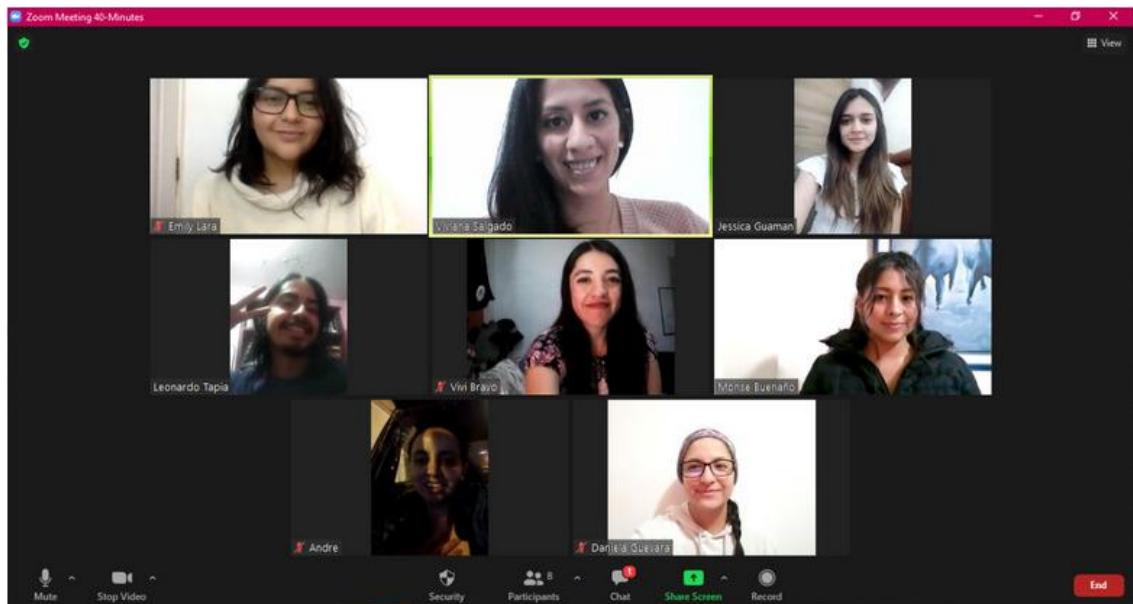

What's up from IAAS Ecuador

November 2020

International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS Ecuador

Hello a fraternal greeting from Ecuador

Due to COVID in Ecuador we still have restrictions to meet and carry out face-to-face activities.

We have been meeting online to plan activities and how to close the year. It was a fairly quiet month because many universities returned to virtual classes and we were able to organize an event to help entrepreneurs in the agricultural and artisan area.

Due to a pandemic in our country, entrepreneurs have suffered a lot economically and we wanted to find a way to help them. We have to stick together and work empathetically a lot more now.

Take good care of yourself and stay at home.

A hug,

Viviana Salgado
National Director of IAAS Ecuador

International Association of Students
in Agricultural and Related Sciences

Entrepreneurship and Training Fair

1-2 November 2020, Conocoto/
Online- Zoom

It was an event in which entrepreneurial students from IAAS Ecuador and private individuals who wanted to publicize their agricultural or artisan products participate.

It began with an online training that lasted 3 days and ended with a virtual fair for those residing outside of Quito. For those who live in Quito and could participate in person, a fair was held on a holiday on the Day of the Dead with all the biosecurity measures in the parish of Cono.

The objective was to make the IAAS entrepreneurs known and to be able to train on how to improve their ventures and legal permits to sell their products.

Signing of the Agreement IAAS Ecuador and the World Wilflife Fund Ecuador

23rd November 2020, Online-
Zoom

The signing of the institutional agreement between IAAS Ecuador and WWF was carried out through a facebook live, being a very important event for our committee to work on conservation issues aligned with agriculture.

Please wait for our upcoming Projects!
See You Soon.

What's up from IAAS France

November 2020

IAAS
International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS France

Bonjour! (Salut! between friends)

November is the third month after we started our academic year and welcomed our newbies. We are only a very small committee and our training makes it difficult to be able to invest in the association for more than 2 years in a row. But with the current board, we are trying to **involve** all the members as much as possible and this entailed weekly meetings on Tuesday. This month was a little bit different because IAAS France was entirely online.

[Instagram]: we have decided to create some post for certain (inter)national day to be active on social networks and promote our unique local committee.

[Partnership]: we presented to our school the interests of making a partnership with our association. Many meetings took place this month and today the school seems to be very interested.

[Scientific event]: we are preparing the first scientific event on agrotourism which will take place in January.

Best regards,

Marie BERNARD
National Director of IAAS France

IAAS November 2020 Newsletter

Social Network

November 2020, Instagram

In order to make itself known, it is essential for an association to be active on social networks. From this unanimous view, we decided to post from time-to-time content on Instagram on the theme of "(inter)national day". The other objective of this activity was to involve newcomers in a fun project that would allow them to immerse themselves in the values of the association.

Creation of A Partnership with The School (ENSAIA)

November 2020, Nancy, France

We have started to establish a partnership with the school. After many meetings, our school is seriously considering getting involved in our association.

Preparation of The First Scientific Event (Agrotourism)

November, 2020, Nancy, France

Development of the first scientific event and for this we launched our advertising campaign to attract as many students as possible.

What's up from IAAS Germany

November 2020

International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS Germany

Hello everyone or as we say Guten Tag zusammen,

As you all know finding interesting events to offer for our old and new members can be very hard at times of Corona. Nevertheless, we conducted a cooking event. Therefore, we'd met at our IAAS garden to harvest the ingredients- of course in due form. These events were all about Jerusalem Artichoke. It was a great opportunity to bond with the new members. Moreover, we also planned our scientific events and started organising.

Corona can't get us down!

Stay safe – can't wait to see you all again
Saskia Buchner
National Director of IAAS Germany

Cooking Event

19th November 2020, Online-Zoom

What a nice cooking evening! Firstly, we had to harvest our own Jerusalem artichoke grown in the IAAS Bonn garden. Therefore, one old member met up with a new member to do the harvesting. Secondly, we collected tasty recipes for everyone to share with.. Thirdly, everyone created a delicious dish with Jerusalem Artichokes at home. You can see two of many results in the photo. During the cooking we had a lot of nice conversations and live tastings via Zoom.

What's up from IAAS India

November 2020

IAAS
International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS India

Hello! Namaste!

Greetings from IAAS India,

We at IAAS India has organized our very first national congress from 31st October to 8th November 2020 with the theme, Empowering Agriculture through Strengthened Leadership. Apart from regular General Assembly Sessions, the program featured Scientific talks and workshops from different field of expertise and a scientific poster competition. The seminar hour of the program consisted of 200+ registrants from diverse states, countries and field of study.

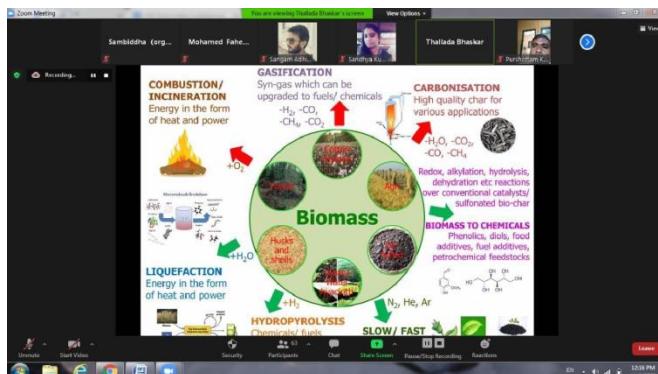

Best regards,

Mushike Saisri

Vice-President of Communication and Membership, IAAS India

15th November 2020, Bogor, Indonesia

Open Dialogue, a part of election event for IAAS LC IPB's future leaders. It was held for them to hear the visions, missions, and work plans of our candidate leaders.

Grow Green Draw More Campaign by IAAS LC UNS

17th November 2020, Surakarta, Indonesia

IAAS November 2020 Newsletter

IAAS LC UNS had collaborated with Campaign to held this event. During the Covid-19 pandemic, our food security and health are the most important objects. Growing vegetables or other food crops is a small thing that really supports SDGs No.2 (Zero Hunger). By optimizing the care of our food crops, we can get crops that we can consume ourselves. This campaign invited us to plant crops that can be consumed. The participants can tell an interesting experience when watering and fertilizing plants. Interestingly, this campaign has prizes for lucky participants.

Local Committee Conference by IAAS LC IPB

20th-21st November 2020, Bogor, Indonesia

in Agricultural and Related Sciences

Greetings from IAAS Iran

Greetings from IAAS Iran

Warm greeting from snowy Tehran from IAAS Iran based at the University of Tehran, Campus of Agriculture and Natural Resources. IAAS Iran as one of the newest members of IAAS Family is pleased to share its first report. We are celebrating today the "Yalda Night" which is a winter solstice celebration; it is the last night of autumn and the longest night of the year. Yalda means birth and it refers to the birth of Mitra; the mythological goddess of light. It's like a warm welcoming to winter. So happy Yalda Night to all of you.

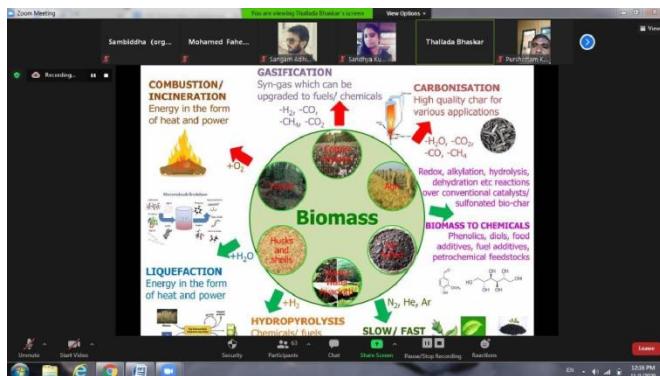

It is our pleasure to hear from you, please do not hesitate to contact us via:
iran@iaasworld.org or hamidian_a@ut.ac.ir

Sending you best wishes

Ali Hamidian
National Director of IAAS Iran

International Conference of Young Scientists “Science for Peace and Development

2nd November 2020, Online-Zoom

The global pandemic sparked by a coronavirus has created new challenges for us, the young academic community. Unfortunately, some of our planned programs had to be cancelled. In the case of closed borders, the internet gives us the opportunity to share our knowledge and present our works by the virtual tools. Therefore, IAAS Iran co-organized the “International Conference of Young Scientists “Science for Peace and Development”. International Online Conference of Young Scientists “Science for Peace and Development” (IOCYS 2020), this one day event consisted of over 15 concurrent panel sessions and activities with over 450 participants attending for the event, coming from 35 different countries via Google Meet and a live stream on Instagram. The event was a joint project between 14 Iranian universities and scientific association and it was organized on 10th November 2020 on the occasion of International Day of Science.

What's up from IAAS Nepal

November 2020

IAAS
International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS Nepal

Hello and Namaste from the lap of Himalayas!

With this year theme "Youth empowerment for sustainable food system; a new normal" IAAS Nepal has successfully accomplishing numerous programs through the local committees. This participatory and pragmatic approaches of IAAS Nepal has increased the cognizance level of food and agriculture in our country.

I am pleased to share that IAAS Nepal is transcending to new height with each passing years and we are entering into the exciting time of growth and extension of our local committees from existing 5 with 7 candidates local committee. We as a team remain committed to deliver the core values and culture of the IAAS so as to build the next generation.

Our team is embracing an extensive planning process to set goals, objectives and strategy to launch the Village concept project in our country where we will create best learning environment and opportunities for our members. We are eager to maintain an IAAS Nepal a wonderful place to work and learn alongside developing networks. The future looks bright as we look the endless possibilities of IAAS.

Sagar Paudel

Greetings from IAAS Netherlands

Greetings from IAAS Netherlands

Hoi and greetings from your IAAS committee at Wageningen University & Research! In November, you may have missed hearing from us in terms of events, but some of our members have been busy behind the scenes. With four members, we are contributing to the organization of the Youth in Agriculture Pre-event to the Climate Adaptation Summit 2021 happening in January, in collaboration with the Dutch Ministry of Foreign Affairs. Three members have been involved in a food system challenge of our university (Team Food rooters, watch the final videos [here!](#)), and we have put efforts in fostering our relations to another international student organization in Wageningen. We are so much looking forward to real-life events again!

If you need anything from us, please get in touch with me! Maybe we can create a fancy online event together.

netherlands@iaasworld.org

My best wishes to you, stay safe, healthy and happy!

Angela Sievernich
National Director of IAAS Netherlands

Greetings from IAAS Paraguay

¡ Hello FamillIAAS !

The month of November, was a very busy month for members between university activities and being able to accommodate themselves within the new online teaching method applied at the university, we were working mostly operationally during the month; focusing our efforts on the organization of the activities of the month of November as the end of the year, with work in conjunction with other organizations.

In addition with the National Board we carry out meetings in order to establish certain activities attempted to develop during the first semester of the year 2021, considering the topics of greater importance for our members IAAS, data obtained during activities during the year.

We hope to be able to offer more activities the rest of the year and start a new year with more challenges. We invite you to stay tuned to our social networks, to know everything that is coming.

Greetings from IAAS Peru

Hello everyone!

This month we wanted to cover points such as sustainable development, ods, raising awareness among IAASPeru members. The presentation "USE OF SEAWATER AS AN ENERGY SOURCE AND IT'S IMPACT ON THE INDUSTRY" held on November 28 (Lima, Peru).

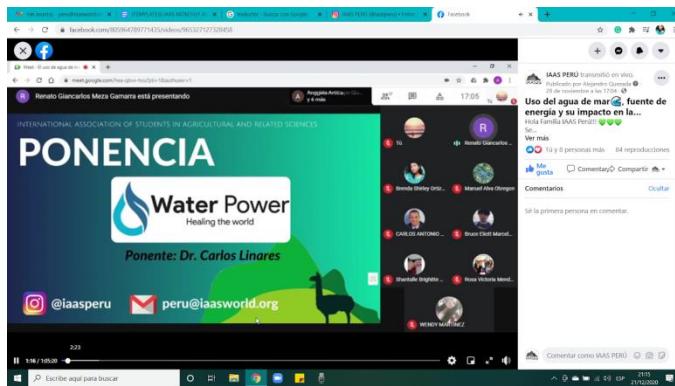

Another important point we made was to see how the IAASPeru tables of 2021 will be chosen, where we seek to train future leaders of iaas at the national level, guiding them little by little to this new world.

Kinds regards,

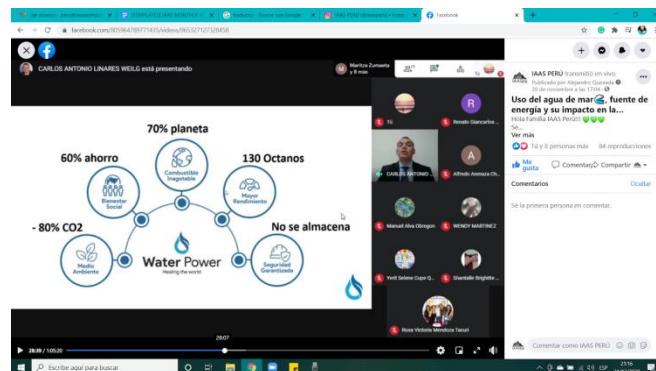

Anggela D. Artica
National Director of IAAS Peru

Use of Seawater as An Energy Source and It's Impact on the Industry

28th November 2020, Lima

This event was held online. The presentation was made by Dr. Carlos Linares on November 28 with the title: "The use of seawater as an energy source and its impact on the industry". It was an opportunity to learn about this renewable resource, not so widely used.

Greetings from IAAS Serbia

Greetings from IAAS Serbia,

Dear IAAser,

Due to the COVID 19 pandemic all our activities were online. We had one team building meeting online with our local committees. We all are working to maintain communication with each other. We worked on setting goals for next year. We have in our plan our traditionally Making New Years celebration for November. We have in plan to have more meetings with the local committee.

Best regards,

Marijana Bajkic
National Director of IAAS Serbia

What's up from IAAS Spain

November 2020

International Association of Students

Greetings from IAAS Spain

Hello!

I'm afraid I don't have any good news to tell. This COVID-19 situation is not allowing us to organise any activities. All our efforts are focused in keeping the members of the two committees in every matter of interest related to IAAS Europe and IAAS World.

Since IAAS Valencia is still a very new committee it is important that they can find the support of our other local committee. We try to have a really fluent communication so they can report any concern they have. This is especially important due to the fact that they are still solving some bureaucratic procedures at their university.

From the National Board we are already looking towards this new year hoping that we will have some opportunities to find new members and motivate everybody after this awful period.

Alejandro Reberiego Carmona
IAAS Spain National Director

What's up from IAAS Taiwan

November 2020

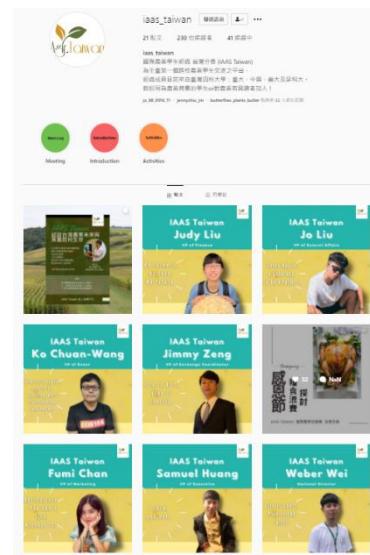

IAAS
International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS Taiwan

Hi! 你好! Greetings from IAAS Taiwan.

Our new cadres have just been handed over, so many internal affairs of the organization are still being adjusted. In the past six months in Taiwan, no local people have been infected with COVID-19, so we can still go out and participate in activities as usual.

In November, we planned new goals of next year, such as recruit more new members in next semester, acquire more sponsorship, cooperate with more organizations, and help agriculture students. According to our goals, we will start a series of activities, including monthly online sharing sessions, a small agricultural trip next semester, and more posts on our IG.

IAAS Taiwan is a small organization, but we believe that in the future, we will be a large organization with many members and accumulate many network resources to help more agricultural students. Eventually, IAAS Taiwan will contribute to Taiwan's agricultural development and interact with more countries. Thank you for reading our monthly report. Hope everything goes well and everyone stays safe.

Best regards,

Weber
National Director of IAAS Taiwan

Greetings from IAAS Turkey

Greetings from IAAS Turkey

IAAS Turkey presents its warm greeting from Omer Halisdemir University, Nigde city of Turkey. IAAS Turkey is a candidate member and is very pleased that has become part of the IAAS World. We are trying to expand the IAAS committees to other universities in Turkey to have at least one local committee.

During month of Nov, IAAS Turkey, along with other MENA region members was working to make a Scientific-Event, which was successfully held on 9th Dec.

Our team is motivated and committed to become a permanent member of IAAS World in the upcoming year and we are hopeful there will be an end to the pandemic situation and we can perform our normal activities.

Best regards,

MARSOOS
National Director of IAAS Turkey

What's up from IAAS USA

November 2020

International Association of Students
in Agricultural and Related Sciences

Greetings from IAAS USA

Up until now IAAS USA has been primarily focused on local chapter activities. Local Committees have been having their meetings, in a distanced or digital fashion, focusing on speakers instead of farm tours. Several chapters also attended IAAS Scientific events, including 'Carbon Sequestration in Agricultural Soils.' We also had two delegates to World Congress this Summer.

The National Committee has been hard at work advancing IAAS USA and growing the organization. We have launched an Instagram account ([iaas_usa](https://www.instagram.com/iaas_usa/)) and are using it to better market events to our membership. For the Exchange Program, our Exchange Coordinator is working on establishing an offering at Mustard Seed Farm in Ames, Iowa. We are also focusing on establishing new chapters, with possible leads at Cornell University and Pennsylvania State University. Finally, the exec team is working to plan our annual National Summit this April, with the theme of 'Community Agriculture in the Heartland.'

Nolan
National Director of IAAS USA
